

# V-Watch Personal Voltage Detector Carrying Case Lanyard

The Carrying Case Lanyard for the V-Watch® Personal Voltage Detector combines the carrying case and lanyard into a single case. The Carrying Case Lanyard is designed to leave the V-Watch permanently mounted inside and offers the dual feature of protecting the V-Watch when not in use and acting as a lanyard for the V-Watch when in use. The V-Watch will not work inside the closed, zippered Carrying Case Lanyard.

## 3 Easy Steps

When it's time to use the V-Watch, simply follow these three easy steps:

1. Remove the V-Watch Carrying Case Lanyard from the belt.

2. Completely open the zippered case. Test the V-Watch for proper operation before use by pressing and holding the self-test button.

3. Extend the lanyard from the top of the case and place it around the neck. Adjust the lanyard so the V-Watch is worn at mid-chest level.

## Features and Benefits

**Shielded case** protects the V-Watch and effectively turns off the V-Watch when not in use

**Adjustable lanyard** allows the user to wear the V-Watch at the proper mid-chest position on the body

**Lanyard lock/breakaway device** adjusts the lanyard and releases it should it become entangled

**Pocket with reflective band** stores the lanyard cord and instruction card, while offering the safety of a light reflecting band for better visibility when working in the field

**Accessory tab** provides alternative way to hang the case or tag it for storage

**No assembly needed**, simply unzip, adjust lanyard and you're ready to go!

**Large zipper pull** easily allows the case to be unzipped, even while wearing gloves

**Rugged belt clip** for wearing the case anywhere on the belt until the V-Watch is ready to be used
