

HD Electric Company's HVA-2000 High Voltage Digital Ammeter

Take ampere measurements on conductors up to 500kV quickly and easily with the HVA High Voltage Digital Ammeter from HD Electric Company. The large, bright, 4-digit LED display allows you to read amps from the longest of telescoping hotsticks. The HVA is lightweight and easy to use on the end of a long hotstick. The HVA features 1% accuracy and will store the last 4 readings, allowing you to read real-time amps directly during live line operations or by using the stored readings function.

Features and Benefits

- Quickly take current readings on conductors up to 500kV (phase-to-phase)
- Measures AC current, 25-500Hz
- Read the measurement in real time from the large digit display
- Stores the last four current readings
- Display is easy to read in bright or dark conditions
- Auto shutoff with low battery function
- Small and lightweight, easy to manage on an extension hotstick
- Dual hotstick connections - universal spline and clampstick
- Use on conductors up to 2.75" (7.0 cm)
- Accuracy 1% of reading
- Made in the USA
