

## HD Electric Company's Hi-Test<sup>®</sup> Insulator Tester

The Insulator Tester tests energized or de-energized insulators for non-visible internal failures at any AC line voltage. These non-visible failures are known causes of Radio Frequency/Television Interference (RF/TVI), blinking lights, recloser operations and blown fuses. They are also a threat to line crew safety when performing energized maintenance. Detect non-visible insulator failures before they cause operations difficulties or safety threats to line crews.

Visit our website to get more information on the Hi-Test Insulator Tester - [HDElectricCompany.com](http://HDElectricCompany.com).
