

HD Electric Company Quick-Check Transformer & Capacitor Testers

HDE's Quick-Check Transformer & Capacitor Testers provide a quick and easy test of the primary and secondary sides of de-energized transformers and capacitors for opens or shorts. The Quick-Check automatically distinguishes between transformers and capacitors and can test capacitors individually or connected in capacitor banks. They operate with a single push-button and provide clear indications of open circuits, short circuits and confirmation that the test results are OK.
