

HD Electric Company TAG® Voltage Detectors

HD Electric Company's single range TAG-200, multi-range TAG-200MR and single range TAG-330 are electronic voltage detectors designed for detecting distribution and transmission voltages. These direct contact type detectors emit both audible and visual indications when placed in contact with an energized conductor. TAG's are designed for overhead and underground applications with optional underground bushing probes.

To get more information visit the webpage for the TAG Voltage Detectors on our website – HDElectricCompany.com.
