

## Important Notice About the HD Electric Company Ramcorder Products

HDE Manufacturing Discontinuation Notice #MDN-06/2013-RC

June 6, 2013

Due to the inability to procure critical components which are essential to the continuation of the HD Electric Company Ramcorder product line, we are forced to cease manufacturing and supplying this product line. This notice applies to all models and all spec numbers of RCMB Meter Base Recorders and OH Overhead Ammeter Recorders (pictured below).

Be assured we have conducted best efforts trying to source replacement components from our global supply chain and all other sources we are aware of. We would like to provide alternate sources to contact to determine if what they provide may be used as a replacement in your application – Sensorlink ([www.sensorlink.com](http://www.sensorlink.com)) or Megger ([www.megger.com](http://www.megger.com)).

As part of our continuous product development efforts, we will explore future development of voltage and current monitoring devices to meet your needs.

Should you have any further questions, please contact Kellie McGinn at 847-473-4980 ext. 318 or send an email to [kmcginn@hdelectriccompany.com](mailto:kmcginn@hdelectriccompany.com).

In closing, thank you very much for your valued business of our Ramcorder product line.

Sincerely,

HD Electric Company
