Cable Distance Meters

HD Electric Company is pleased to announce an addition to our growing product line. The **Cable Distance Meter** is a handheld meter for measurement of cable sag, cable height distance and overhead clearance of conductors. It is a modern alternative to telescopic measuring poles. The Cable Distance Meter utilizes ultrasonic signals to determine the height of overhead cables. The CDM-50 will measure cables up to a height of 50 feet and the CDM-75 will measure cables up to a height of 75 feet.

The Cable Distance Meter is a part of our Electrical Power Products division, which consists of Electrical Test and Measurement, Controls and System Measurement and Utility Specialty Products. Our Utility Lighting Products division offers a range of lighting products for use during nighttime operations, storm conditions or limited light conditions. For more information on this or any of our other products, please visit our website at www.HDElectricCompany.com or contact us by phone at 847-473-4980.
