NOMAX SOFTWARE UPGRADE

April 1, 2005

Dear Valued Customer:

Please be advised that there is an updated version of the NoMax Capacitor Control software (version 5) that is now being shipped with NoMax controls. **Note: This is NOT a mandatory upgrade. Customers do not have to upgrade if they are comfortable with the version they are currently using.**

The updated version has a new look, an improved user interface as well as some new features. It will work with previous NoMax models and runs in Windows 98/2000/NT/XP. The software is available to download from our website on the NoMax Capacitor Controls page. **Be sure to uninstall any previous versions of the NoMax software before downloading version 5.** Click on the link below, scroll to the bottom of the screen and follow the instructions to save the software to disk and install:
