Product Change Notification

Important Upgrades and Changes to the TAG 5000 Product Line

Due to a policy of continuous improvement, important changes have been made to the TAG 5000 Wireless Phaser product line. A summary of the changes are: **Beginning April 1, 2010, only TAG 5000 Transmitters and Receivers with matching serial numbers may be used together. The only notable difference in the serial numbers will be that the Transmitter serial number will contain a "T" and the Receiver will contain an "R".**

The changes to the TAG 5000 do not affect the general performance nor change the operating characteristics from previous TAG 5000 you may currently be using.

Please contact HD Electric Company with any questions.
