### NEW Carrying Case Lanyard for V-Watch® Personal Voltage Detectors

HD Electric Company's **NEW** Carrying Case Lanyard for the V-Watch Personal Voltage Detector combines the carrying case and lanyard into a single case. The Carrying Case Lanyard is designed to leave the V-Watch permanently mounted inside and offers the dual feature of protecting the V-Watch when not in use and acting as a lanyard for the V-Watch when in use. The V-Watch will not work inside the closed, zippered Carrying Case Lanyard.

All it takes is 3 easy steps when it's time to use the V-Watch:

1. Remove the V-Watch Carrying Case Lanyard from the belt.
2. Completely open the zippered case and test the V-Watch for proper operation.
3. Extend the lanyard from the top of the case and place it around the neck, adjusting the lanyard so the V-Watch is worn at mid-chest level.

The V-Watch is now ready to provide that extra level of safety by detecting and alerting you to the presence of electrical fields or energized equipment.

For more information on the Carrying Case Lanyard, please visit HDE's website at [www.HDElectricCompany.com/vwatch.htm](http://www.HDElectricCompany.com/vwatch.htm).
